

# Lean Yellow Belt for Sustainable Business

**The programme provides learners with a comprehensive overview of Lean Six Sigma concepts, with a large focus on utility-specific, real life case studies that demonstrate tangible improvements across a variety of sectors and organisations in the areas of Energy, Water and Waste.**

**This Lean Yellow Belt Programme is certified by the University of Limerick (3 ECTS Credits - NFQ Level: 8). The programme is designed to introduce students to practical application of Lean tools & techniques using the standard A3 methodology.**

## Programme Benefits

### Learn from Leaders

Our training programmes are developed with the support of Lean experts who have extensive industry experience in leading Lean Projects.

### Sustainable Benefits for your Business

Applying Lean tools and techniques within your organisation can lead to energy reduction, better waste management, and water conservation. Participants will also gain an understanding of the impact of their workplace's environmental and sustainability strategies, leading to the creation of a culture of sustainability within the organisation.

### University Certification

Upon course completion, participants receive a University accredited Level 8 Certificate in Lean Six Sigma. Professionals on this programme will formally register with the University of Limerick, providing them with full student access.

#### Please Note:

Depending on your requirements, this programme can also be delivered as a customized, in-house corporate programme, for organisations wishing to standardize their internal Lean programmes, while still offering external university certification.

## Who is this Programme for?

This programme is aimed at individuals looking to acquire or develop Lean Six Sigma skills in order to embark on, or participate in, a Lean Business improvement initiative:

**Individual Learners** looking to participate in professional development and gain Lean Certification.

**Teams and Individuals** responsible for utilities within their company, developing skills both individually and delivering tangible impacts at the site level.

**Departmental Managers or Process Owners** tasked with developing and championing Lean projects.

## The Learning Experience

The programme is comprised of three key learning elements:

### Workshop Webinars

Five 90-minute webinars throughout the duration of the programme.

### Self-paced online modules

Online Modules can be completed at your own pace, in your own time. We will signpost what modules to complete at the different stages in the programme.

### Work-based Project

This is the project that you will take through the programme with you, allowing you the opportunity of real-world application of the various Lean tools & techniques to your utilities-based project.
